

Hummingbird Documentary DVD Now Available

A documentary production lead by award-winning filmmakers, *Refracted Glory* dives into the centuries of intrigue surrounding hummingbirds.

90 MINUTES
plus extended interview content

ALSO AVAILABLE

Watch amazing slow-motion footage of the awe-inspiring hummingbird, filmed exclusively for this documentary. Explore the physics of hovering flight alongside scientists, pilots and engineers. Learn about hummingbird biology — and why finding their fossils in Europe is significant.

With captivating interviews, *Refracted Glory* was called “almost encyclopedic” by one viewer for the depth of content. Topics such as; engineering, history, and biology combine to present a truly meaningful message.

Learn about helicopters from pilot Brandon Hummingbird and understand hummingbird flight with the help of Professor Andy McIntosh.

Ken Ham and Michael Oard guide us through an unexpected fossil discovery. David Menton explains the extraordinary vision of hummingbirds and Christopher Witt tells of hovering giants.

Join our study of hummingbirds as we venture into ancient history, modern engineering, intriguing discoveries and eternal Truth.

This DVD continues to get a good response from audiences and there is always excitement toward the topic of hummingbirds. *Refracted Glory* sprang from such an excitement... a desire to show others the marvel I've grown up watching at our kitchen window.

Realizing many science aspects had not yet been told in documentary form, I began an in-depth study of hummingbirds with the purpose of creating a fully comprehensive presentation.

I've read even the most recent scientific papers relating to hummingbirds, and these studies prove nothing beyond what we read in the Bible. In fact, the science affirms to the truth of God's word.

The glory of God is evident, not only in the macro-scale of the universe, but also in the nano-scale of living creatures.
